

Valves, Automation & Controls

STANDARD PORT, UNI-BODY FLANGED BALL VALVES

Design Features

- ASME B16.34 Design**
 Standard port, Uni-body design meets all the requirements of ASME B16.34 for Class 150 ball valves.
- Blow-Out Proof Stem**
 The internal entry stem is machined with a heavy shoulder to prevent blowout.
- Anti-Static Configuration**
 Anti-static devices are included at two points on the valve stem to provide continuous ball-to-stem and stem-to-body grounding, to prevent build-up of static charge in the valve.
- Live-Loaded Stem Seals**
 Stem seals are live-loaded using Belleville washers to provide consistent sealing forces, reducing or eliminating the need for frequent seal adjustment.
- Fully Encapsulated Body Seals**
 Provides consistent and controlled loading of the body seal compression through a full metal-to-metal contact joint design, eliminating seal extrusion and potential body joint leakage.
- Integral Mounting Pad**
 Ideal for actuation, ISO 5211 mounting dimensions simplify fit and alignment between valve, bracketry, and actuator. Permits easy field conversion from manual operation to actuation.
- Lockable Handle**
 Sharpe Series 54 ball valves are supplied with lever handles designed to permit locking the valve in either the open or closed position. Sizes through 2½" are supplied with a latch engaged at open and closed positions to prevent inadvertent operation. Larger sizes have a lockable pipe handle.
- Slotted Seat Design**
 Relief slots are provided at the perimeter of the seats to equalize pressure in the body cavity with the upstream line when the valve is closed, preventing upstream seat extrusion and enhancing downstream seating performance.

- Seats and Seals**
 Available with TFM (1 1/2" -4") and RTFE (6" and 8") seats. Stem packing and body seals are PTFE.
- Floating Ball Design**
 Precision engineered and machined solid stainless steel ball with relief hole in the stem slot prevents build-up of cavity pressure while the valve is in the open position.
- Material Traceability**
 Body and end piece casting are marked with the heat codes providing traceability to the chemical analysis and material test reports performed at the foundry. CMTR's (Certified Material Test Reports) are available upon request.
- NACE**
 NACE MR-0175

Seat Pressure -Temperature Rating

Note:
 The maximum pressure/temperature ratings of the valve assemblies are limited to lowest of the body or seat material fitted.
 The valve body ratings are based on ASME B16.34 rating for materials.
 The graphs are based on laboratory testing and our experience in field.
 The seat ratings depend on the material, design, application and function.

Sharpe Seat Materials

- TFM** **M - TFM® PTFE**
 Dyneon® TFM PTFE is a second generation PTFE with improved chemical and heat resistant properties and stress recovery. Its temperature range is -100°F to 500°F (-73°C to 260°C) Color - white.
- RTFE** **R - Reinforced Polytetrafluoroethylene (RTFE).**
 PTFE's mechanical properties are enhanced by adding 15% filler material to provide improved strength, stability and wear resistance. Its temperature range is from -320°F to 450°F (-196°C to 232°C). Color-off-white.

Technical Information

Size	C _v	Weight (lbs.)
1-1/2	82	16
2	120	17
2-1/2	240	26
3	350	34
4	720	56
6	1020	122
8	1800	184

Applicable Standards

Wall Thickness	ASME B16.34
Face to Face Dimensions	ASME B16.10
Flange Dimensions	ASME B16.5
NACE	MR-0175
Pressure Test	ASME B16.34, API 598 (optional)
Basic Design	ASME B16.34

How to Order

Size	Series	Class		Body		Seat		Options			
1-1/2	54	11	150	4	Carbon Steel	M	TFM™ (1½"-4")	OH	Oval Handle, Non-locking up to 2"		
2				6	Stainless Steel	R	RTFE (6"-8")				
2-1/2											
3											
4											
6											
8											

4" - 54 - 11 - - 4 - - M - = 4" 54114-M

Example: 4" 54114-M,

4" Series 54 Standard Port, Uni-Body Flanged, Raised Face, Class 150 Ball Valve, Cast Carbon Steel Body with 316 Stainless Ball and Stem, TFM Seats, PTFE Body Seal and Stem Packing.
